Re: Former Wheeling Pitt Steel Corporation  
Brooke Senior Center Parcel Status

Dear Mr. Joseph:

This letter is in response to Go Green America Recycling LLC (Go Green) request for information regarding the Environmental Protection Agency's (EPA) activities to investigate and address contaminants at an approximately 2-acre parcel of property (Brooke Senior Center Parcel) (see Figure 1, attached) located within the former RG Steel-Wheeling facility (Facility), north of the city of Follansbee in Brooke County on West Virginia Route 2, Wheeling, WV.

EPA issued a Final Administrative Order (Order) to Wheeling Pittsburgh Steel Corporation (WPSC) on June 29, 1989, requiring the investigation of the Facility. The information provided to EPA by WPSC under the Order indicates that the Brooke Senior Center Parcel was not an area of the Facility where hazardous waste or hazardous substances were managed or released.

EPA has determined that there are no known potential threats to human health or the environment at the Brooke Senior Center Parcel. Therefore, EPA has determined that it will propose as the final remedy for the Brooke Senior Center Parcel that no further investigation or remediation is required. EPA's proposed remedy will be subject to a 30-day public comment period. EPA will select the final remedy for the Brooke Senior Center Parcel after addressing any comments received during the comment period. If EPA determines that new information or public comments warrant a modification to the proposed remedy, EPA may modify the proposed remedy based on such new information and/or public comments.

Please feel free to contact me at 215-814-3433 if you have any additional questions.

Sincerely,

A handwritten signature in cursive script that reads "Estena McGhee".
